

Chronicles of Crime – new re-designed locations

Below, you will find new location cards, which can be used in any fan-made scenarios.

As a player : To use these locations, simply print them and use them in replacement of the original locations.

As a scenario designer : To add such location to one of your fan-made scenario, simply use <loc=A'>.

Important : these scenarios substitute to the original ones. Meaning : you can't create a scenario which would use both B et B' location. The flashcode is actually the same !

Important : These cards only redesigns PNP locations which were publicly released for PNP by Lucky Luck games. A,B,C,D,F,G,H

Note : Other locations could technically be redesigned too, but this would able players who didn't buy the game to play it.
